## Horde: Zombie Outbreak

**Madowl Games to release Horde: Zombie Outbreak on Steam Early Access - 30/07/18**

Ever wanted to control a bloodthirsty horde of zombies and wreak havoc on cities around the world? Well now you can! In Horde: Zombie Outbreak the player assumes the role of the zombies and must overthrow the world by infecting the humans! Each person you infect will become part of your horde. As your horde grows stronger so to does the human resistance, the player must use abilities that are linked to certain zombie types to help them fight through the police, swat and army!

Your infecting journey will start small, but quicker than you can say “brains!” your horde will be a terrifying un-dead force! Most humans will flee, some will fight and some will even ram their cars through your precious zombies! Almost everything can be destroyed, smash peoples homes, total their vehicles and rip apart their favourite hot spots from the inside out.

#### Game Modes

**Conquest** - Fight against time and the resistance through increasingly difficult zones, complete all the objectives and finally destroy the city landmarks! Play tactically to avoid the resistance wiping out your precious zombies, use abilities to stay hidden and destroy buildings and cars to increase your time! Unlock new cities to infect by completing conquest in other countries. First stop London. Next up Moscow.

**Endless** - How long can you and your zombies last in an Endless city rampage? No time limits just pure destruction! Compete on the leader boards against your friends and the rest of the world for zombie horde glory! Choose your favourite zombie and the abilities that suit your style of play.

#### Future Content

**More cities** - We plan to release new cities from around the world which you can destroy with your horde.

**More zombies** - More zombies with new abilities will give players even more choice on how they command their horde.

**New game modes** - More ways to play the game, more ways to infect and destroy. Co-Op, map editor and challenges are all possibilities.

Whatever the weather!  
Fight in thunderstorms,  
rain and lightning may  
envelope the city but  
that won't be what the  
humans are scared of!

Massive hordes! Big  
hordes mean big  
scores! Infect as many  
innocent humans  
before the resistance  
becomes too strong, and  
give yourself the best  
chance to reach the top  
of the leader boards!

Incoming! The army  
bring rockets, and  
zombies are not good  
with explosions! Avoid  
the rockets or take the  
resistance out before  
they can target your  
horde.
